Kärcher B 50 W Bp

Record observations for service. This sheet does not diagnose or authorize repairs.

Use only information already available from a safely stopped machine. Do not run a faulty machine to complete this sheet. Follow the matched manual and workplace shutdown procedure; do not open protected parts, bypass interlocks or test live circuits.

1 Identify the machine and document

Full model / product or order number

Date / reporter (keep private)

Serial / asset reference (share privately)

Power / deck / panel / fitted options

Manual number / revision / region / page

2 Capture the existing symptom

Order number; R55 / O51 or other deck; full display message; low suction versus low water flow.

Exact message / code / indicator / beep pattern

What happened, when it began, and which functions still worked

Visible pattern / operating context / recent changes

3 Separate observations from a suspected cause

What was actually observed (include what is unknown)

Any earlier action, who performed it, and the result (or write None)

4 Prepare the handoff

Question for qualified service / source correction needed

Scope reminder: Match the full order number, deck and battery package. R55, O51, D51 and D60 are not interchangeable records. Exact serial coverage and component compatibility remain unconfirmed.
